Resident Faculty Articles Now Available

Nearly 50 articles written by resident faculty of The Pankey Institute are now available for viewing on www.pankey.org/news/faculty_articles.aspx. Published in a variety of journals, including JADA, Dental Practice Report, Dental Economics, Woman Dentist Journal, Spectrum, International Journal of Periodontics and Restorative Dentistry and Journal of Dental Technology, these articles cover an array of topics. Included are clinical, philosophical and business subjects.

"These articles have helped us spread the word about The Pankey Institute to the dental community at large," said Dr. Lee Brady, who has published articles on coming to The Pankey Institute (A Virtual Tour of The Pankey Institute, Spectrum) and on dental implants (Woman Dentist Journal), among others.

"It's helpful to have our resident faculty's articles gathered in one place," said Dr. Steve Ratcliff. "This is a prolific and talented group of professionals, who have taken seriously their obligation to inform the public of proper clinical techniques and about the Institute itself."

As articles are published in the future by resident faculty, they will be posted on the website.
